Landscape Enhancement/Public Space Activation

Pine rocklands are a globally imperiled ecosystem native to Southeast Florida with plant and animal species found nowhere else. After winning a Miami Foundation Public Space Challenge, MDC's InterAmerican Campus will be transforming part of its landscaping into pine rockland habitat and activating this space for public use. Civic engagement and service-learning opportunities will be available for students, and pine rockland modules will be incorporated into participating faculty's curricula.

Upcoming workdays (volunteers needed)...

- March 20 1:30 – 2:30
- March 29 1:30 – 1:30
- April 4 noon – 2:00
- April 11 noon – 2:00
- April 18 noon – 2:00
- April 22 (Earth Day) 10:00 – 1:00

Meet on the corner of SW 6 Street and SW 25 Avenue.
