

Saturday Clean-Ups & Eco-Restorations

10-25 Hours Service Learning Opportunity

In collaboration with several local environmental organizations and the Earth Ethics Institute (EEI), students will work on restoring South Florida's natural habitats in the form of cleanups, invasive species identification and removal, native planting, and other ecological conservation efforts. This service learning opportunity is ideal for students who are too busy during the week to find time to complete their hours. Saturdays, once or twice a month*, students will have the chance to visit several different habitats and conservation sites around Miami-Dade County and serve. Transportation to the sites will **not** be provided; however, carpooling can always be arranged.

For more information, please contact Stephanie Victoria - (305) 237-2602 - svictori@mdc.edu, or stop by the EEI office at Kendall (Rm. 8201-4), Wolfson (Rm. 3506-12), or IAC (Rm. 3210-F).
