A. Pine Rocklands Lesson Plan

1. Go to google images and project pictures of pine rocklands in class.
2. Assign reading on www.miamidade.gov/environment/pine-rocklands.asp
3. Have students answer the following questions:

B

1. Where do pine rocklands grow?
2. How much of the pine rocklands is left in Miami?
3. What vegetation is found in pine rocklands?
4. What is the dominant plant species?
5. What are some of the animal species?
6. What are prescribed fires and why are they important for pine rocklands?
7. Why is it important to preserve pine rocklands?

C. After class discussion of questions have students form groups of 4 and begin preparing a presentation of a topic pertaining to pine rocklands to be presented in the following class.

Topics can include the following:

Vegetation in pine rocklands

Animal species in pine rocklands

Prescribed fires

Remaining pine rocklands
