Please form groups of 5-6 students to answer the following questions:

1) What are some environmental factors that contribute to health problems?
2) What are some possible solutions to address these environmental factors that negatively affect our health?
3) What can you do as nurses to address these problems discussed?

As a collective group, accept the Campus EcoChallenge and select 3-4 challenges to address as a group. Create a YouTube account and post pictures and information about your EcoChallenge process on campus. Use this link to accept the EcoChallenge: https://campus.ecochallenge.org/

Use the other links below to gather information to formulate your responses:
