Lesson plan for Earth Charter discussion with Pediatric Theory students.

Aim: To make students aware of the Earth Charter, Little Earth Charter and how to apply it to the practice of Pediatric Nursing.

Materials needed: Each student will be informed to print out their own copy of the Little Earth Charter and read all of the charter before coming to class.

When students arrive for class, each will be given a piece of paper with a number 1 – 8 on it. These numbers will identify the groups.

Each group will be assigned a part of the Little Earth Charter to discuss and will give a brief report to class. (5 minutes)

Students doing Community Health Nursing at the same time will be encouraged to think how they might apply this information when working in a service-learning situation with a group of children.
