INVASIVE EXOTICS

Objective

To promote awareness of environmental damage caused by non native plants.

Procedure

Students will watch a short video "Invasive Exotics." This video discusses how non native species can damage the environment. After watching the video, students will answer the following questions:

1. What is a habitat?
2. Can you name two common plants to Florida?
3. What does it mean when a plant is a native species?
4. What is a bromeliad and can you name one?

Assessment

Students will discuss the answers to each question and review pictures of native species. Students will also discuss their personal responsibility in ensuring that they select native species for their gardens.
