

Talavera, Ernest, College Prep  
Preparing Students for a Green World

Please share your ideas on ways you might teach students through your discipline how they can live more sustainably:

1. I'd like to share copies of the TERMS AND ALL THAT GARBAGE handout given to us at the Montenay Power Plant with my students. I'd like them to know the basic terms on waste generation and disposal. This could be the basis to start class discussion.
2. I will assign students to take a walking tour of their immediate neighborhoods and assess issues of waste disposal/general neighborhood cleanliness. Students will then write a short paragraph on their neighborhoods in terms of waste management, disposal, general environmental upkeep, etc.
3. One assignment could be a tour of downtown Miami streets close to the college and perhaps a 'clean up' the streets day.
4. Students could reflect and write about how the environment and its sustainability are viewed in their native countries.
5. Great way to share information about changes to curbside recycling procedures in Miami-Dade County
